Statutory steering group meeting and workshop and in Oslo 20th November

November 20th 2018 we call for a statutory steering committee meeting and a workshop to discuss the future development of OpenTNF. We would like to see you there!

The summary from the meeting in May 2018 is available at <http://www.triona.eu/news/2018/successful-opentnf-seminar/>. Now it's time to take next step by conducting a statutory steering committee. The purpose is to set the framework for the committee work. In connection to this we will also arrange a workshop where we in a working team start the work to define;

- Which sample datasets that would be most appropriate to publish on www.opentnf.org.
- Which data directories that would be most appropriate to publish on www.opentnf.org (as aid and examples for potential new users).

The workshop will take its starting point from a business process perspective. We plan to send some basic material to the participants in advance, giving us all the best possible start.

The meeting will be held at Triona's office in Oslo November 20th 2018. We start at 13.00 and plan to end at 17.00. Registration must be made no later than November 13th 2018. The registration is done by sending an e-mail to registration@opentnf.org.

Have you not yet registered how you and your organization can contribute to or follow the development of OpenTNF? Please send me an e-mail to registration@opentnf.org where you stat if you/your organization want to;

1. be a part of the **steering group**
2. active contribute by being a part of the **working team**
3. follow the development by getting information

We are looking forward to seeing you in Oslo.

Triona AB

Mats Bayard
